PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building scalable web applications and REST APIs with Laravel and modern JavaScript frameworks (Next.js, React, Vue.js). Experienced in API architecture, real-time systems (WebSockets), headless CMS integrations, payment gateways (Stripe, Tabby, Tamara, FirstData) and multi-language platforms. Led a development team with code reviews and CI/CD on GitHub Actions. Uses AI tools (Claude Code, Claude, ChatGPT) to speed up delivery and improve code quality, and has shipped two Android apps and a Windows desktop tool end to end through an AI-directed workflow.

WORK EXPERIENCE

Senior Full Stack Developer Jun 2024 - Present

Monglish International Academy & Edulixa360

- Built and maintain the Commerce API (centralized data center) with Laravel, Redis caching, Stripe payments, Google Sheets API, Swagger/OpenAPI documentation and Sentry monitoring.
- Developed the admin dashboard for Monglish and Edulixa360 (Laravel 12, Blade, Tailwind CSS, Alpine.js): per-country package pricing with a pricing audit, orders across Stripe, Tabby and Tamara, coupon codes, lead forms, tracking pixels, and role-based access (Spatie Permission) with a full activity log.
- Built the Marketing Calendar System: a Laravel API synced with Office 365 through Microsoft Graph, and a React + Vite frontend with Recharts, Radix UI and Framer Motion.
- Developed a real-time internal marketing system with Laravel Reverb (WebSockets) and Pusher, and a Next.js + Laravel Echo frontend with drag-and-drop boards, dashboards and PDF/Excel export.
- Built the Monglish website (Next.js App Router, Strapi headless CMS, next-intl, Tailwind CSS, Jest) and the Edulixa360 website (Next.js, Zustand, React Hook Form + Zod, shadcn/ui).
- Delivered landing pages (AI4Teachers, Monglish Kids 360, Investment, Solidarity) in Next.js and Vue.js, and form apps with resumable file uploads (tus-js-client).
- Led the development team: system architecture, code reviews, and CI/CD deployment pipelines with GitHub Actions.

Full Stack Developer Jul 2019 - Jul 2024

US Legalization

- Developed a Laravel web application for uslegalization.com with FirstData payments, FedEx shipping API, a document order timeline, shopping cart, invoice mailing and an admin panel.
- Built a Laravel application for acma.us with Excel product import, digital signatures, FedEx shipping and multiple payment methods.
- Created a WordPress site with a custom theme for usapostille.com, and custom order-form plugins with Stripe and FedEx for onedayapostille.com, dcapostille.com and california-apostille.com.

Junior Software Developer Jun 2017 - Feb 2018

IT Wolf Solutions

- Developed Saydality, a patient and pharmacy web and mobile app (CodeIgniter, Bootstrap, Ionic 3), and Taxi Masr, a fare-counter mobile app (Ionic 3).

Web Developer / Data Analyst Nov 2015 - Nov 2016

KAUMEYA Language School

- Managed and designed the school website on WordPress; analyzed student grades, built charts and managed data in Excel.

PROJECTS

Dawa2 - Offline Medication Reminder (Android) Oct 2026

Product owner, AI-directed development | amrcs92.github.io/dawa2-site

- Private, offline medication reminder with full-screen alarms that keep ringing until the user answers Taken, Snooze or Skip; English and Arabic, no accounts, no cloud.
- Expo, React Native, Kotlin native module, SQLite. Wrote the spec with ChatGPT, chose the UI from Claude Design mockups, directed Claude Code through the plan, and tested on emulator and real devices.

Fakkerni - Arabic-First Alarm and Reminder App (Android) Oct 2026

Product owner, AI-directed development | amrcs92.github.io/fakkerni-site

- Right-to-left alarm and reminder app: offline reminders, medication with dose tracking and refills, and encrypted backups to Google Drive via Google OAuth.
- Delivered across 10+ milestones (Expo, React Native, Kotlin, SQLite); owned every product and release decision; in Google Play internal testing.

Claude Usage Tray - Windows Tray App Sep 2026

Personal tool, AI-directed development | github.com/amrcs92/claude-usage-tray

- Windows tray app that shows Claude plan usage (5-hour session and weekly limits) with a live icon, a popup dashboard with pacing hints, and notifications at 80% and 95%.
- Python, WebView2, pytest (35 tests), packaged as a single .exe with PyInstaller and published as a GitHub release.

SKILLS

Backend: PHP, Laravel, Laravel Sanctum, Laravel Reverb, REST APIs, Swagger/OpenAPI, MySQL, Redis, Spatie Permission, Spatie Activity Log, Stripe, Microsoft Graph API, Google Sheets API, OpenAI API

Frontend: JavaScript, TypeScript, React, Next.js, Vue.js, Tailwind CSS, shadcn/ui, Radix UI, Zustand, React Hook Form, Zod, Recharts, next-intl, Livewire, Alpine.js, jQuery

DevOps and tools: Git, GitHub Actions (CI/CD), Linux, Docker (basic), Sentry, Strapi CMS, WordPress

AI tools: Claude Code, Claude, ChatGPT, Claude Design, MCP integrations (Jira), AI-assisted testing and documentation

EDUCATION

BSc in Computer Science (Minor: Software Engineering) 2014

Arab Academy for Science, Technology & Maritime Transport

CERTIFICATIONS

Full Stack Development Internship 2017

Information Technology Institute (ITI): Linux, DevOps, JavaScript, PHP, MySQL, Laravel, AngularJS

LANGUAGES

Arabic: Native | **English:** Fluent
